\*\* percentage value of total FTE

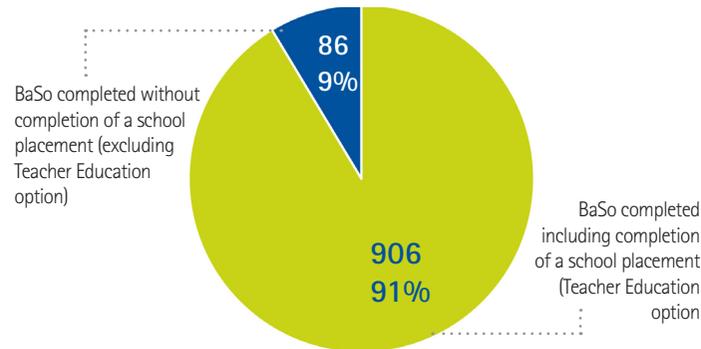

\*FTE according to interdepartmental matrix, excluding students on leave of absence, doctoral candidates and exchange students

## Final examinations completed in polyvalent bachelor's degrees including and excluding Teacher Education as an option\*

### Intersciplinary Bachelor's Degree (FÜBa)\*\*

### Bachelor's Degree in Special Education (BaSo)\*\*

\*\* number of final examinations from WiSe 2016/17 - to SoSe 2019 including and excluding school placements

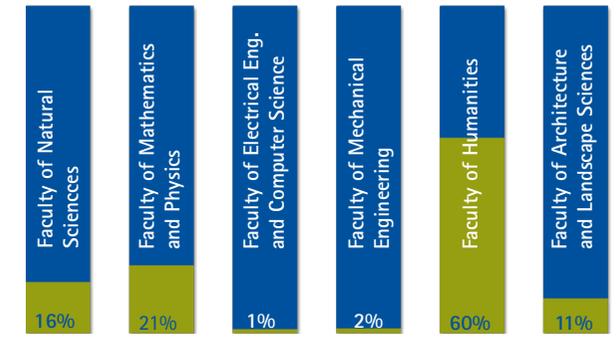

### Teacher Education Percentage of the Full-time Equivalent

In order to differentiate student full-time equivalents (FTE) including and excluding teacher education as an option in the intersciplinary Bachelor's Degree and the Bachelor's Degree in Special Education, the percentage of graduates (three-year average) from each degree programme who have completed a school internship were included. The calculated Teacher Education FTE was then compared to the total FTE (excluding students on leave of absence and doctoral candidates) per subject and faculty.

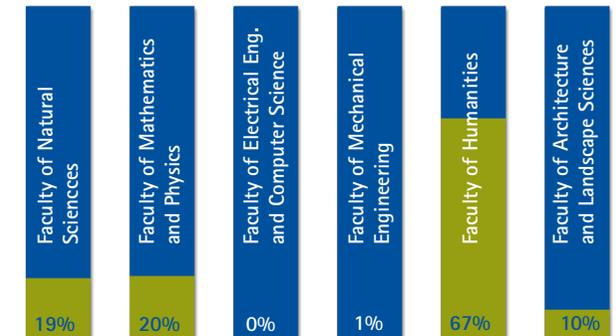

\*No distinction was made between the graduates of the Bachelor Technical Education course based on the school placement, because this is mandatory for the students.

## Teacher Education students in the participating faculties

### Percentage of Teacher Education Students\*

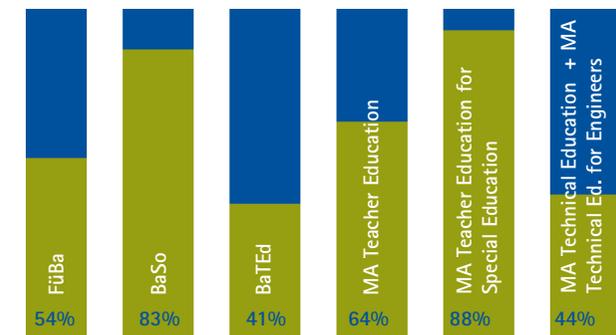

### Final examinations completed by Teacher Education students\*

\*FTE according to interdepartmental matrix, excluding students on leave of absence, doctoral candidates and exchange students

### Percentage of female students completing Teacher Education and polyvalent bachelor's degrees

\*\*Students/subjects according to their sought degree qualification
